

NITRIC ACID TECHNICAL GRADE

Number of revisions: 8
Date of last revision: 11.01.2016

General Information:

Chemical formula: HNO₃

Molecular weight: 63.01

Appearance: transparent, slightly yellow liquid

Use: formulation of mixtures, manufacture of chemical products,
metal surface treatment and others

CAS No.: 7697 - 37 - 2

EC No.: 231 - 714 - 2

Neochim PLC code: 11-01

Specifications:

Indices	Typical Values	Limit Values
HNO ₃ content, %	58 - 60	min. 55.0
Ignition residue, %	0.02	max. 0.04
Sediment	none	not allowed

Packing:

Packing: Customer's packing

Date of issue: 07.05.1992

These data are based on our current knowledge, experience and technical equipment. They do not relieve customers of carrying out their own tests and experiments, due to the great diversity of possible effects in processing and application of our products. They do not imply any legally binding assurances of certain properties and applications. The recipients of our products ought to abide by the existing legislation and regulations as well as possible reserved rights.
