

**PRODUCT
SPECIFICATION**

**OXYGEN
GASEOUS, TECHNICAL GRADE**

Number of revisions: 12
Date of last revision: 30.05.2023

General Information:

Chemical formula: O ₂ Molecular weight: 32.00	CAS №: 7782-44-7 EO №: 231-956-9	Neochim PLC code: 20-01
Appearance: colourless gas Use: welding, cutting, heating and brazing; shield gas for welding processes		

Specifications:

Indices	Typical Values	Limit Values
Oxygen (O ₂) content, vol. %	99.0	min. 98.5

Packaging:

- steel cylinders

Date of issue: 07.05.1992

These data are based on our current knowledge, experience and technical equipment. They do not relieve customers of carrying out their own tests and experiments, due to the great diversity of possible effects in processing and application of our products. They do not imply any legally binding assurances of certain properties and applications. The recipients of our products ought to abide by the existing legislation and regulations as well as possible reserved rights.
